THE BALTIC SHADOW PLAN: For the future of the Baltic Sea

This shadow plan presents NGO requests to HELCOM for the Baltic Sea Action Plan (BSAP) update.

The Baltic Sea Action Plan (BSAP) adopted in 2007, by the Helsinki Convention, had the goal to restore the Baltic marine environment to a good ecological status by 2021. However, the nine Baltic Sea Countries are **nowhere near achieving this goal**.

The vision of the BSAP for "A healthy Baltic Sea environment, with diverse biological components functioning in balance, resulting in a good environmental/ecological status," cannot be reached without explicit implementation of the ecosystem approach across all the segments of the Action Plan and engaging all economic sectors and human activities within the Baltic Sea catchment area.

We are in the midst of a biodiversity and climate crisis. Healthy marine and coastal life and habitats are essential to our resilience to ecological and climate breakdown. We are dependent on marine and coastal ecosystems to be healthy and rich so that
